RS150 wireless loudspeaker

- The RS150 Wireless Loudspeaker is an easy-to-use wireless speaker, that while relatively compact, still delivers a larger-than-life premium home audio performance.
- Includes a variety of built-in casting technologies: Spotify® Connect, TIDAL® Connect, Apple® AirPlay® 2, Bluetooth®, Chromecast, and Roon, letting you easily stream to the RS150 from your favorite streaming apps on your smart devices. Does not require any dedicated control app.
- Uses Bluetooth 5.0 with support for high bitrate Advanced Audio Coding (AAC), Qualcomm® aptX™ HD for hi res audio playback, and Qualcomm aptX Low Latency for improved audio transmission speed.
- Its moderate size allows it to be placed and easily relocated to just about anywhere in your home.
- Power output has been doubled compared to previous model, with the woofer receiving 90 Watts and the tweeter 30 Watts.
- The woofer has been upgraded from a 4" to a 5-1/4" diameter driver; this along with a larger and reengineered woofer enclosure produces higher output with lower distortion and deeper bass extension.
- Features our new, quick responding illuminated digital output meter.
- Compatible with TIDAL HiFi's Hi-Res playback of 24-bit/192kHz. It is also a Roon Ready endpoint device. Google Assistant compatible.[1]

1) Requires use of a third-party Google Assistant device with voice input (sold separately). The RS150 and Google Assistant device must be on the same network.

Phone not included.
