

SoundWare XS

DIGITAL CINEMA

Key features

-  Incredibly small speakers provide big, high performance sound
-  Connects directly to your TV
-  Dolby Digital decoding and Digitally Optimized Virtual Surround
-  Dedicated music and movie playback settings
-  Included wall brackets can be positioned at almost any angle
-  Bluetooth enabled for music streaming

Powerful Performance

The SoundWare XS Digital Cinema home theater speaker system envelops you in rich, room-filling sound. This is the ultimate 2.1 Virtual Surround Sound system from Boston Acoustics. Connect this system directly to your TV for a fully immersive sound experience. Thanks to Boston's Digitally Optimized Virtual Surround Sound processing, the two ultra-compact speakers and subwoofer deliver virtual cinematic surround sound effects that defy their size.

Easy Setup

Two high-gloss, ultra-compact, cube-shaped speakers fit neatly next to your TV, or can be easily hung on the wall with the included brackets. The powerful 8-inch subwoofer features BassTrac® circuitry for clean bass at all listening levels.

EZ Connections

The SoundWare XS Digital Cinema Home Theater Speaker system connects directly to your TV without the need for any additional components. The system is extremely easy to set up and use. In fact, the entire system can be used with your existing TV remote control, eliminating the need for yet another remote. And, after a few simple connections, you are up and running.

Ultimate Flexibility

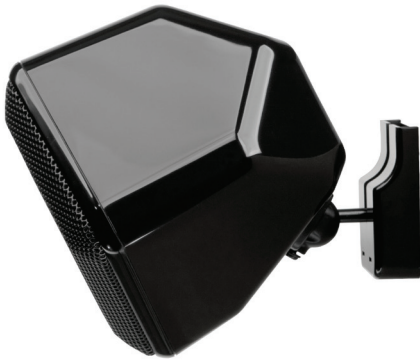

One special feature of SoundWare XS Digital Cinema is the selectable "Movie" or "Music" playback mode. This option tailors the sound for both movies and music. In the "Movie Mode", you will enjoy crisp, clear movie dialogue and powerful cinematic special audio effects while the "Music Mode" delivers concert-quality music reproduction. And after you set this option once, the system automatically remembers your setting.

The SoundWare XS Digital Cinema includes a digital optical input for true Dolby Digital decoding, RCA AUX inputs, and a mini-stereo AUX input for a portable media device. For even more flexibility, the SoundWare XS Digital Cinema is Bluetooth enabled so you can wirelessly play anything from your A2DP compatible tablet, laptop, iPhone, Android, or Blackberry device! Thanks to the "Music" Mode, your music will sound exactly as the artist recorded it – pure.

Remote Control and Control Pod

The system's Control Pod includes status lights and a sensor for the remote control. You can control your SoundWare XS Digital Cinema with the included remote control or the Control Pod can learn your existing TV remote.

Articulating Mounting Brackets Included

Articulating mounting brackets can be positioned at almost any angle and will allow you to aim the SoundWare XS satellite speakers toward the listening area.

Bluetooth® Wireless Audio Streaming

Stream audio to the system wirelessly from any Bluetooth A2DP enabled device, including smartphones, tablet computers, and portable media players.

Additional features

- Boston engineered for best-in-class performance
- Simple and functional design fits with any HDTV
- Digital input features Dolby Digital decoding for superior surround sound
- Boston's Digitally Optimized Virtual Surround processing for pinpoint, theater-like, surround effects
- Boston's BassTrac® circuitry for more bass without distortion
- Mini stereo AUX input to connect your mobile device

* Digital optical cable included
