- Wireless subwoofer can be positioned horizontally or vertically
- Boston's BassTrac® circuitry for more bass without distortion
- Exclusive Boston DSP Control Switch maximizes performance whether mounted on a wall or placed on a shelf
- Additional mini stereo AUX input to connect your mobile device

Cinematic Sound, Concert Quality Music

The TVee Model 30 is an advanced speaker system with virtual surround sound that envelops you in rich, room-filling audio. Get the best of both worlds with the system's unique Movie and Music settings that tailor the sound for both movies and music. In the "Movie Mode", you will enjoy crisp, clear movie dialogue and powerful cinematic special audio effects while the "Music Mode" delivers concert-quality music reproduction. Perfectly sized for HDTVs 40" or larger, the TVee Model 30's soundbar achieves its stunning audio performance through the inclusion of three 3½" Fiber Ceramic Copolymer Material (FCCM) mid-bass drivers and three ¾" Dome Tweeters, plus a powerful 7" FCCM subwoofer in a compact tuned bandpass enclosure for maximum bass performance.

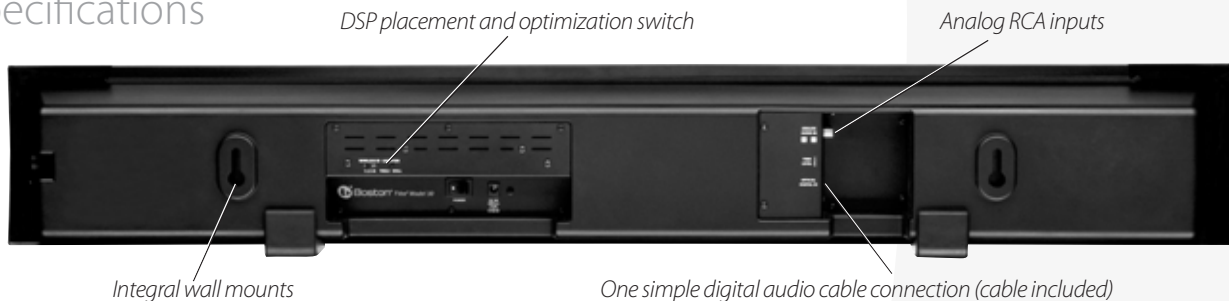

Wide Variety of Placement Options

For total placement flexibility in any home entertainment environment, the TVee Model 30's slim soundbar can be mounted on a wall above or below a TV, or rest on a shelf, cabinet or table. The soundbar features integrated keyhole wall mounts, eliminating the need for separate mounting brackets, and the built-in rubber feet allow it to be placed safely on any flat surface. Adding even more flexibility, a DSP "location" control switch maximizes the performance of the soundbar based on placement (on a wall or on a flat surface). Plus, the compact wireless subwoofer can be placed either vertically or horizontally, allowing you to place it virtually anywhere in the room, even in a corner behind a couch or under a bed and still enjoy great, powerful bass performance.

Simple Setup

The TVee Model 30 soundbar uses your television remote control and with just one cable to connect to your HDTV, you'll be up and running in no time. And because the subwoofer is wireless, you can place it just about anywhere in your room.
