

All-in-One Soundbar with Powerful Bass built in

TVee 10 Soundbar

Features

Powerful audio performance for any TV

Easy one wire hookup

Soundbar learns your existing remote control

Dolby Digital and Boston's Digitally Optimized Virtual Surround

Dedicated music and movie modes

- Boston engineered for best-in-class performance
- Boston's BassTrac® circuitry for rich bass without a separate subwoofer
- Both analog and optical digital inputs for flexibility; cables included
- Mini stereo AUX input to connect your mobile device
- Integrated keyhole mounts for easy wall-mounting

Powerful Audio Performance for any TV

The TVee 10 soundbar envelops you in rich, room-filling sound. TVee 10 is a simple, plug and play solution that dramatically improves the audio performance of virtually any TV. It brings powerful, quality, and dynamic audio to TV, movies, games, and music. Connect this system directly to your TV for a fully engaging sound experience.

Digitally Optimized Virtual Surround Sound

Boston's Digitally Optimized Virtual Surround (DOVS) recreates the cinema surround experience using sophisticated digital processing. The result? Absolutely amazing sound effects from a single soundbar. Whether you are watching TV or a movie, playing a game, or listening to music, the TVee 10 soundbar provides a fully immersive sound experience without a separate subwoofer.

Use that remote you already own!

TVee learns your television's remote control commands, so you don't have to add yet another remote to your coffee table. Since the same television (or cable box/TiVo/satellite box) remote control can control your TVee soundbar, operating the system is as easy as watching TV. Plus we include a simple remote for setting up the system.

One simple digital audio cable connection
(cable included)

Integral wall mounts

Touch sensitive controls
