

play outside. play smart.

If you enjoy spending time on the patio, by the pool, or under sail, Boston's weatherproof Voyager® speakers are just what you need. Every screw, gasket, enclosure, binding post, and grille has been built to withstand even the harshest conditions, and still deliver great sound flawlessly.

## Voyager Outdoor Speakers

## Think outside the house.

Boston Voyager Speakers are designed to blend gracefully with virtually any outdoor setting and are specially voiced for open-air environments. These tough and durable outdoor speakers feature rustproof hardware and connectors, powder-coated aluminum grilles, UV-resistant polypropylene cabinets, and are designed to withstand the harshest weather and temperature extremes. Each speaker, anchored by a heavy-duty aluminum c-bracket, is incredibly easy to mount and is designed to fit the tightest spaces. Voyagers are available in black or white.

## Voyager Metro II. More sound, less space.

Great stereo sound from just one speaker. The Voyager Metro II plays stereo sound from a single speaker enclosure. The Metro II is ideal for outdoor locations with limited space.

Available in Black and White

## What it means to be from Boston.

Many manufacturers design speaker systems around third-party, off-the-shelf parts. Boston Acoustics engineers every component of every system to meet the highest performance standards (our own). Of course, performance is only one measure of value. So we're careful to build all our products with strict attention to everything from the choice of materials to the details of fit and finish. It's how we've been exceeding the expectations of serious listeners for over thirty years.
