

MX-Vynl

If only all phono stages were this good to use!

- This is the only **fully balanced phono preamp** in the group, despite having the lowest price.
- It **looks and feels great** – half width and nearly half depth. Its **machined casework** and crisp-acting controls add to the **attractive compact**, nuggety, **up-market** vibe.
- A **little bolder** and more **crisply defined**.
- Fully balanced design, easily setup with well balanced, **evenhanded sound**.
