

## Stream Box S2 Ultra

**"You won't be disappointed"**

- It's **highly sophisticated** and **heavily optimised** for **audio quality**
- Dispel any thoughts that a product has to be big to **deliver a full-scale sound**.
- It's **sharply focused, generously weighted** and capable of an **open, fast sound** that **drips with detail** while at the same time **majoring on musical flow**.
- The Pro-Ject pairs with a good DAC to **sound powerful, gutsy and beautifully refined**, with everything from large scale orchestral works to the most intimate of singer-songwriter tracks.
- A slick little unit, it might look tiny but it's **capable of delivering great sound**.
