

## Stream Box S2 Ultra & Pre Box S2

**“I think very highly of these fine little pieces of gear. ”**

“I was surprised and amazed at how good it sounded! Detail, space, resolution and musical believability were all very good.”

“This configuration was even better and I definitely could listen to this pair a lot and not be disappointed.”

**They are a steal for someone trying to get some really good network streaming sound. I especially liked that it supports Qobuz and I definitely liked using the Pro-Ject Play app; highly recommended!**
