

## Juke Box E

„You won't find better if you're looking for a do-it-all device.“

Based on the award-winning Pro-Ject Primary turntable, the Juke Box E is a **brilliant combination of digital and analogue audio**.

As well as a built-in phono stage (for connecting an amplifier and a turntable) there's a pre-amp and a 50W power amp, so you can **simply plug in the speakers and play**.

If you're looking for a vinyl-centred do-it-all device that can act as the heart of your hi-fi system you won't find better .
