

## *RPM 3 Carbon*

With great pleasure we announce that **Pro-Ject Audio Systems** has received for the **FIFTH TIME** one of the most important award in consumer electronics worldwide, the EISA AWARD.

The **RPM 3 Carbon** allows the ingenious entry to the world of audiophile luxury turntables. Evolutionary enhancements like a low resonance chassis, a 10" S-shaped tonearm tube, a magnetic antiskating and a TPE-damped counterweight add up to a miracle in sound for the price with an ultra-stylish look.

The **RPM 3 Carbon** is available in three different high-gloss lacquer finishes (Black, white, red): Recommended retail price without cartridge is € 650,00 and with included Ortofon moving magnet cartridge "2M Silver" it is € 699,00.

**Pro-Ject Audio Systems** is strengthening its position as a globally vital international brand in the CE industry!

## ABOUT PRO-JECT AUDIO SYSTEMS

Pro-Ject Audio Systems was founded by Heinz Lichtenegger 1990 in Vienna, with the idea that analogue playback is the most cost-effective way to listen to music of audiophile quality.

Inspired by the concept of supporting analogue in the face of the digital onslaught, Pro-Ject Audio Systems became one of the most powerful driving forces in reinventing analogue turntables for the hi-fi market. Today, Pro-Ject Audio Systems is the world leader in the manufacture of quality hi-fi turntables, as turntables are once again accepted as a must-have for every concerned music lover. Pro-Ject products are exported to almost 80 countries worldwide and is the recipient of nearly every award in the audio industry. Pro-Ject produces more than 15 different models to satisfy any taste, wish or requirement of the customer.

BY PRO-JECT AUDIO SYSTEMS

Since 2006, PRO-JECT Audio has been bringing its idea “less is more” mission to the digital world. Inspired by the new possibilities of the iPod and high-quality music reproduction from a PC or laptop, Pro-Ject Audio Systems has designed a complete new and revolutionary range of MICRO HIGH-END Hi-fi components under the family name

BOX DESIGN. Starting with the smallest audiophile amp in the world, with open and euphonic sound, Pro-Ject Audio now produces all of the components of traditional hi-fi systems including CD players, tuners, phono amps, headphone amps and switching modules, as well as digital products such as docking stations, D/A converters and streamers to connect with the PC wired or wireless.

All of the components are packaged in Micro ‘cigarette pack’-sized boxes, which allows the stacking and mixing of the components according to the needs of the consumer. BOX DESIGN regards itself as the ‘next generation of hi-fi’ – the link between the micro-sized hardware of the IT world and the big boxes of the audiophile world. All products, except for speakers and headphones, are designed and produced in Europe.

PRO-JECT: Simple-to-use, high quality sound, astonishing value, long-term stability and good service.

## ABOUT EISA

EISA European Imaging and Sound Association is the unique association of 50 special interest magazines from 20 European countries. It was founded in 1982 and is internationally known for the European EISA Awards. In June each year, the editors-in-chief from all EISA member magazines meet to decide which products analysed in their publications during the past year deserve the coveted EISA Award. The six categories under consideration are: Audio, Home Theater, In-Car Electronics, Photography, Video, Mobile Devices and ‘green electronics’.
