

The Classic

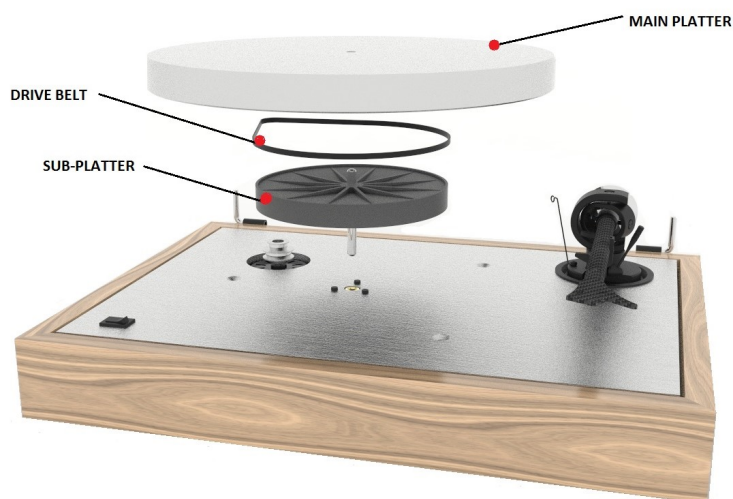

„Classically pretty turntable landed at ours.“

Featuring a traditional wooden frame with an elegant appearance of the '50s and' 60s, the Pro-Ject The Classic turntable has an absolute 21st century sophisticated mechanism. Analog beauty has finally arrived!

Inside the simple, compact housing, a belt drive with low-noise AC motor works with an ultra precision, DC-driven AC generator for the most stable speed control.

The chassis contains 6 TPE (thermoplastic elastomer) vibration absorbing balls, which have a significant effect on the sound quality.
