Verdict:	98
Value for Money:	9.8

In short and high:

- + Excellent sound
- + Quality design
- + Quite value for money
- nothing

Evaluation:

Excellent / Upper Class

Summary

The Pro-Ject The Classic turntable is truly a classic. It's wonderful. Setting it up is easy, but requires precision and attention. The most recognizable finding is that The Classic does not contain any automatic, which would negatively affect the sound quality. Apparently here, and proven by ear, everything is done for the music. And it is obvious that such a classical turntable requires much more care than any digital device. It is worth the time, because in exchange you get brilliant sound quality.
